### **DETAILED ACTION**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 4-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites how the immobilization support is formed and the support used for adsorbing a binding material, but it is unclear what structural limitations are required for immobilization support. It is unclear whether only the polyanionic thin film and the polycationic thin film are

2. Claims 5 and 6 provide for the use of an immobilization support, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 5 and 6 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd. App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1641

3. Claims 4-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kornguth et al. (US 5,629,213).

Kornguth et al. teach an immobilization support comprising a polyanionic thin film (col. 2, lines 56-61; 15a, Fig. 4); a polycationic thin film layered on top of the polyanionic film (col. 2, line 61-col. 3, line 2; 15b, Fig. 4), which is an electrolyte film as described by the instant claims, and a material that binds to a substance to be detected or a material that has an affinity therefore immobilized on the support (col. 2, line 66-col. 3, line 9; 15c, Fig. 4), wherein the material is a protein (col. 3, lines 6-9).

Regarding claims 5 and 6, such limitations are drawn to uses of the immobilization support and are not given patentable weight. Furthermore, Kornguth teaches a protein immobilized to the immobilization support as described above.
